FULL-STACK WEB DEVELOPER

Designer and developer of PHP-based websites and applications: from corporate to e-commerce * Speaker of 3 languages with proficiency * Over 20 satisfied clients from 12 countries in 6 years * Leader of design and development departments at 2 companies * Proficient user of GNU/Linux.

FIELD SPECIALTIES

- Accessible, mobile-oriented UX/UI and graphic design expertise, with Figma and Inkscape
- SEO-focused front-end development with HTML5, CSS3, TailwindCSS, and JavaScript
- CMS-based, back-end, and APIs development with WordPress, PHP, MySQL, and Laravel
- Version control, deployment and automation with Git, SSH, Bash Scripting, Apache Server

RECENT EXPERIENCE

Full-Stack Developer, *Bwired Managed IT Services,* Canada   2024 – 2025

I served as a dedicated developer for Atomlabs, a division of this company, working remotely with a modern stack of technologies to develop crucial features and SEO enhancements.

Full-Stack Developer, *Alex Molina Web Solutions*, Freelance   2023 – 2024

I developed multiple websites and web applications for 16 clients, autonomously, employing both modern and traditional approaches to meet their marketing and e-commerce needs.

Front-End Developer, *Pagie Portal BV,* Netherlands   2022

I contributed to two online store development projects for clients of the Company, using PHP and front-end technologies, also carrying the responsibility of leading the design department.

WordPress Developer, *Building Up Agency*, Venezuela   2021

I led the building process of multiple corporate websites for Spanish companies at this agency in a remote setting, working with a combination of WordPress and front-end technologies.

Front-End Developer, *Megala Projects*, Venezuela   2020 – 2021

I designed user interfaces using Figma, and worked on WordPress-based website revamp, for multiple divisions of the Company in a remote setting, improving their online presence.

EDUCATION

Graphic Design, *UIT "Antonio José de Sucre"*, Venezuela   2021
